Experienced software engineer with strong proficiency in data structures and algorithms. Skilled in DevOps practices, consistently delivering high-quality solutions to complex technical challenges.

WORK EXPERIENCE

Software Engineer OPSWAT - Cybersecurity	Mar 2026 - Present Hanoi
Fullstack Developer Remitano - Cryptocurrency Exchange	Sep 2024 - Mar 2026 Remote
- Developed an ERP service that maintains pull requests and links with documents to manage the goals and tasks of the product. - Developed an anomaly detection service for detecting anomalies in on-ramp and off-ramp flows using AWS Cloudwatch. - Maintained and optimized the KYC service (kyc-service), reducing operational costs while ensuring stability and performance. - Worked within a Ruby backend stack, aligning with Remitano's core technology ecosystem.	
Software Engineer Intern Teko Solution JSC	Jul 2023 - Aug 2024 Hanoi
- Developed and maintained web application using FastAPI and Python to assist Sales in customer care and reporting to managers in efficiency and streamlined communication. - Developed a website using Golang in a monorepo to manage forests and carbon credits for users in Africa, resulting in a increase in user engagement. Simplified the map loaded from the server, resulting in a 70% reduction in user's map loading time and a 50% decrease in API response size. - Developed components related to forms, maps, and notifications in a mobile app using the Flutter framework - Implemented a CI/CD workflow to automatically publish the Flutter app using Fastlane resulted in a 60% decrease in deployment time.	
Researcher Software Engineering Laboratory VNU University of Engineering and Technology	Mar 2022 - Apr 2023 Hanoi
- Developed a source code analysis tool in Java, C Sharp, and PHP that represented dependencies in graph form using frameworks and JavaScript, resulting in a 60% increase in speed for Dependency Analysis. - Published a paper about the tool and submitted it to The Scientific Research Conference for Undergraduates 2023 at UET-FIT. I also built microservices and authentication for the tool.	

EDUCATION

Bachelor of Information Technology VNU University of Engineering and Technology Hanoi	Jun 2021 - Jan 2025 GPA: 3.5
- Special Prize in the Naprock Procon Competition in Japan 2024 - Champion in the The National Procon 2023 - Third prize in The 2021 ICPC Asia HaNoi Regional Contest - Second prize in the 2021 ICPC Vietnam National Programming Contest - First prize in the IAI-Hackathon (UET Hackathon) 2023 - First prize in the Coding Inspiration Hackathon Organized by FPT Japanese club in 2023	
Major in Informatics and Physics Lao Cai High School for the Gifted Students	Jan 2018 - Jan 2021 Lao Cai
- Consolation prize in Vietnam National Olympiad in Informatics (2020 – 2021) - Silver Medal in The Hung Vuong competition for high school gifted student	

SKILLS

Developer Tools: Git, Github, Postman, Cursor AI
Technologies: C/C++, Flutter, Java, Golang, Javascript, Ruby, React, Docker, Kubernetes

PROJECTS

Smart Home	Mar 2024 - Jun 2024
The Smart Home project developed a mobile app for managing IoT devices with map-based visualization, using Home Assistant, Flutter, and Spring Boot. I contributed to app and backend development, IoT control, and Firebase Notifications integration, achieving a 30% faster response time, 25% better alert reliability, and 90% user satisfaction in testing.	
MindMap AI	Aug 2023 - Nov 2023
In the MindMap AI Project, I developed a web application that helps users create mind maps and flowcharts. The application utilizes AI to automatically generate mind maps and flowcharts based on user input, resulting in a 30% reduction in time spent on creating diagrams.	
Dictionary	Oct 2022 - Dec 2022
In the Dictionary Project, I implemented a Trie data structure to reduce search time by 80% compared to conventional methods, enabling efficient word suggestions based on shared prefixes. Additionally, I integrated the Google Translate API for English to Vietnamese translation.	

LANGUAGES

Vietnamese (Native proficiency) • **English** (Professional working proficiency)
